SUMMARY

Dynamic full-stack web developer with a passion for crafting seamless digital experiences from front-end dazzle to back-end brilliance. Armed with a knack for problem-solving and an eye for design, I thrive on turning ideas into interactive realities. Let's build something extraordinary together!"

EXPERIENCE

SDE 2 - MERN Stack & Python Developer

[mple.ai](#) [Full-time, In-office \(Mumbai, India\)](#) **December 2025 – April 2026 (5 months)**

- Engineered and shipped production-grade features for mple.ai's core product using the MERN stack (MongoDB, Express, React, Node.js) and Python, maintaining high code quality in a live environment.
- Integrated and optimized Large Language Model (LLM) pipelines to power intelligent, context-aware application features.
- Built and improved Speech-to-Text (STT) and Text-to-Speech (TTS) capabilities, leveraging Amazon SQS for asynchronous message processing and workflow orchestration, enabling seamless voice-driven user interactions within the product.
- Collaborated with cross-functional teams to develop, test, and iterate on AI-driven features, translating product requirements into scalable backend and frontend solutions.
- Maintained and enhanced the production application, ensuring reliability, performance, and uptime across real-world user workloads.

Full stack Developer

[ETHDC Technologies Pvt Ltd](#) [Full-time, In-office \(Pune, India\)](#) **February 2025 – July 2025 (6 months)**

- Kickstarted a new education-focused web application, setting up project architecture and core modules.
- Contributed to both frontend and backend development, ensuring seamless integration and optimized performance.
- Collaborated within an agile development team to build scalable features and fix bugs.
- Occasionally utilized Figma and Visily for UI reviews and wireframe feedback.
- Ensured clean, maintainable code while following best practices in both frontend and backend environments.

Full stack Developer

[Corestance Technology PVT.LTD](#) [Online](#) **April 2023 – January 2025 (1 yr 10 months)**

- Led a team of 4-5 members and supervised 26-28 interns as a Full Stack Web Developer.
- Collaborated closely with UI/UX designers and senior software developers to create web applications.
- Developed both frontend and backend functionalities for company products as well as projects for the Government of Maharashtra.
- Implemented real-time chat functionalities and APIs for Android developer teams, enhancing project interactivity and connectivity.
- Contributed to the integration of AI and ML algorithms into web dashboards, enhancing surveillance capabilities and optimizing data analysis for actionable insights.

Software Developer Intern

[Corestance Technology PVT.LTD](#) [Online](#) **November 2022 – April 2023 (6 months)**

- I have completed Internship at Corestance Technologies from Nov 2022 To April 2023.
- During internship I have completed all the tasks given by company.
- Most of the work is in full stack development with Python and Django Framework also worked with APIs .

Skills

Programming Languages : Java, Python, JavaScript C++, C

Backend Development: Django, Spring Boot, NestJs , Django REST Framework, Microservices Architecture, RESTful APIs, WebSocket (Django Channels)

Frontend Development : ReactJS,NextJs HTML, CSS, Bootstrap, Tailwind CSS, Responsive UI Design

Databases & Caching : PostgreSQL, MySQL, MongoDB, Redis, Database Design & Optimization

Cloud & Deployment : AWS (EC2, S3), Azure (Basics), Linux Servers, Apache2, Nginx, Unicorn, Docker (Basics), CI/CD with GitHub Actions

Software Design & Tools : Object-Oriented Design (OOD), Design Patterns, Version Control (Git/GitHub), Agile & Scrum Practices, Figma/Visily for UI Review

Security & Authentication : OAuth2, JWT, Role-Based Access Control (RBAC)

Soft Skills : Team Leadership, Client Communication, Problem Solving, Analytical Thinking, Ownership & Initiative, Time Management

Education

B.Tech in Information Technolgy M.S. Bidve Engineering College Latur - [8.29 CGPA]	2020-2023
Diploma in Computer Engineering V.D.F.School of Polytechnic, latur - [83.43%]	2017-2020
SSC Nilkantheshwar Vidhyalaya Neoli - [72.40%]	2016-2017

Certification

- Offline IT Training at Atos Prayas Foundation, conducted by GTT Foundation
November 2022 - December 2022 [\[Certificate \]](#)
- Introduction to Flutter Course
August 2023 - September 2023 [\[Certificate \]](#)

PROJECTS

AI Based Smart Receptionist for MSBECL [\[Link\]](#)

February 2022 - September 2023

- AI Based Voice Assistant Using Python , Based on Sample Data It Can Able to Give Response, It Has Ability To Fetch Real Time Data from Internet and able to take Decisions.

Official Website of College [\[Link\]](#)

January 2021 - June 2023

- Official Website Of V.D.F School Of Engineering & Technology Latur, Pages With Rich Text Editor and Dynamic Gallery, Admin Panel for centralized control, we can host this website with linux instance.

Freelancing Website - MayLancers [\[Link\]](#)

November 2021 - December 2021

- A Freelancing Website Developed By Using Python (Django), MYSQL Database With The Help Of MYSQL-CLIENT, It has Responsive UI and User Management - Login and Registration and also admin panel provided for centralized control.

Ecommerce Website - DreamH [\[Link\]](#)

June 2020 - October 2020

- A Ecommerce Website Developed Using Python (Django),This website having features like order tracking system and responsive categorized product, For database designed with the help of django models and hosting for production can be possible with linux instance.
-
